

Zika eLearning

In just 20 minutes, this eLearning course provides the information your workforce needs to reduce their risk of contracting this mosquito borne virus.

Managed Risks

The impact of Zika can be significant. This is not only serious for an individual's health, but also to your workforce's productivity. It can affect business continuity, drive up healthcare costs and ultimately impact a company's reputation.

Prepared People

It is important that those in affected areas have the information they need. Your workforce needs to be Zika aware and so that they can prevent contracting it and help contain its spread.

Providing appropriate training, is one way of helping to ensure that your personnel stay fit, healthy and productive. Training will help them know what to do before, during and after their travel, or even decide whether to delay travel altogether.

Adopting this eLearning course demonstrates that you are fulfilling your corporate responsibility, while reducing the risks to those travelling.

Timely and Relevant

This course covers core information for those living or travelling in Zika-affected areas including:

Prevention

- Practical precautionary advice on how to protect against exposure
- Pregnancy-related guidance

After Travel

- Knowing what to do when returning from a Zika-affected area and the precautions to take

Duty-of-care

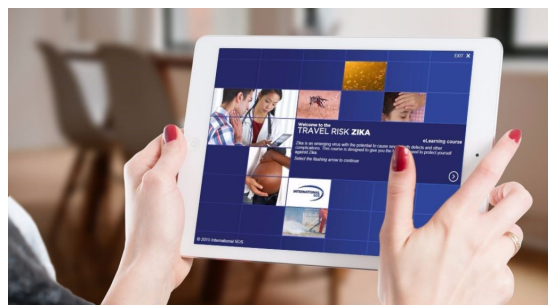

- Knowing how to reduce the risks to personnel and how to respond to an outbreak
- Learning how to respond to the changing situation by monitoring accurate and timely sources of information .

Service Summary

Our eLearning courses complement Membership by delivering expert insights to a global workforce.

This Zika eLearning provides:
