

# Travel Risk Policy Advisory

Understand how to meet and go beyond simple Duty of Care. Guide your mobile workforce away from medical and travel security risks. This consulting engagement will improve your policies to deliver continuous improvements and a return on prevention.

## Travel Risks

Without the right travel risk policy in place you could be putting your people in harms way. Even with the right tools, if your team are unaware of their responsibilities you could be exposing yourself to unnecessary business disruption or even litigation.

Road traffic accidents, food-borne illnesses, local tropical and infectious diseases often impact business travellers. Unprepared, the effects on your personnel and your company could be serious.

It is important not merely to react, but to actively mitigate the risks by making the right planning decisions. By so doing you maximise the productivity of your mobile employees.

## Tuning Your Policy

No matter where your policy sits on a scale of maturity, our Travel Risk Policy Advisory will help you to:

- Clarify your company's commitment to healthy and safe travel
- Agree ownership and support buy-in and alignment with stakeholders
- Raise awareness, understanding and compliance with your Duty of Care obligations.

Our travel risk expert will lead you through the process to help you develop a best practice travel risk policy. Each engagement follows a proven, standardised process.

## Service Components

As part of the engagement the following areas will be addressed:

1. Organisational Preparedness - scope, roles and responsibilities; including assessment of company-specific risk
2. Preparing for Travel - mitigation measures; training, fitness for travel, pre-travel risk assessment, travel approval and compliance
3. During Travel
  - Advice during travel - monitoring events, communication and advice
  - Response to incidents - identifying exposure, providing information and assistance
4. Post Travel - post-travel illness and returning to work
5. Review and Audit - testing and maintenance.
