

2019-NOVEL CORONAVIRUS: OUTBREAK PROTECTION SERVICES

As a world-leading expert in managing outbreaks, our medical and security specialists are on-the-ground providing accurate information on how to mitigate further risks and ensure business continuity. Aimed to address your organization's unique challenges, our outbreak protection services, **Enterprise Health Security Center (EHSC)** has been designed exactly for the purpose of responding to global threats like 2019-nCoV. EHSC offers 4 key features to help your organization:

SITE MONITOR (nCoV Plan):

On-going incident Monitoring - EHSC provides access to detailed operational information on the status of this and other Pandemic threats. Users can turn on automated email alerts so they are kept up to date on threats to their specific work locations.

Manager to-do lists (playbooks) for multiple scenarios for this threat - It includes pre-scripted and customizable communications, posters, procedures, presentations, planning tools and other resources.

Medical content kept up-to-date as situations change - In an evolving outbreak, information will continue to come out that require plan modification. EHSC medical experts maintain the content, so your team can focus on business operations.

30 Minute Briefing Session - Access to an International SOS subject matter expert to address your most important questions and concerns.

To learn more about our Outbreak Protection Services, please contact your account manager or email, Inquiries@internationalsos.com.

2019-NOVEL CORONAVIRUS: OUTBREAK PROTECTION SERVICES
