

COUNTRYWATCH INDIA

Essential for global businesses operating in India, CountryWatch India complements your membership by equipping your Managers with credible assessments for navigating a complicated COVID crisis in an inherently complex environment through credible and holistic Health & Security Intelligence.

Growing Business

India has complex business environment, representing significant security and health safety challenges for companies operating or having substantial business travel within the country. The country presents great opportunities, yet pandemics, terrorism, extremism, social and sectarian conflict are prevalent threats. In this dynamic environment, accurate and timely security and health information is an important component of an effective risk mitigation program

Here To Help

CountryWatch India is a specialised Intelligence, Assessment and Advisory service. As an enhancement to membership, it is designed for organisations with business operations or any recurrent travel exposure in India including for those with sourcing supply chains in the country. It offers deeper coverage of health and security issues throughout India. By providing more detailed information, combined with access to a dedicated regionally based Security Desk with local language expertise and sources, organisations gain an added layer of Intelligence.

Delivered by dedicated teams based in South Asia and supported by International SOS' global network, organisations are now better able to ensure the security of their employees and assets as well as the continuity of their operations in India.

Service Components

Subscribing to CountryWatch India provides:

- Daily email alerts on security related incidents that are likely to have an impact on your operations and business continuity.
- 24/7 SMS text alerts on major security incidents.
- Access to a dedicated India Security Desk that includes several multilingual Security Specialists and Managers via telephone and email, for further discussion on published reports, locations and itinerary specific travel advice.
- A Weekly COVID-19 Health & Security Bulletin that seeks to provide holistic Intelligence on how the pandemic and linked pandemonium is impacting India. The report includes a Nationwide Status Update, statistic-driven deep-dive analysis on COVID-19 case numbers, variants, healthcare and medical infrastructure, vaccination trends as well as COVID linked socio-political unrest, a coverage of notable security incidents and ancillary risks including natural disasters. An analysis on country-level and international mobility restrictions and the regulatory environment driven by COVID-19. A retrospective summary of the past week and a forecast are also part of the report summary. (Note: This Bulletin shall only be published until warranted by the COVID-19 situation in India).
- Long-form, monthly analytical Special Reports that account for specific security risks/concerns, their fallout and comprehensive assessments.
- Occasional webinars delivered by India Health and Security Experts
- The service also holds the unique capacity to be made be spoke to your organisation's specific security needs and objectives with a wholly customised and tailor-made approach.
