MEDICAL & FIRST
RESPONDER TRAINING

STCW 2010 MCA

MedAire's STCW'10 training offers something for everyone. The course format allows crewmembers to complete the training applicable to their job duties and/or mariner certification requirements, based on prerequisites being met.

Crewmembers may attend 2 days, 3 days, or the entire 5 days of training depending on the level of certification required.

FLEXIBLE OPTIONS

MedAire's STCW'10 training can be provided on your vessel, with your equipment. Crewmembers may attend 2 days, 3 days plus eLearning, or the entire 5 days of training depending on their level of certification required. The stacked course format allows the opportunity for crewmembers to undertake the training level applicable to their job duties and/or mariner certification requirements, based on applicable prerequisites being met. It is also an opportunity to up-skill your crew.

STCW'10 PROFICIENCY IN MEDICAL CARE ON BOARD: 5 DAY

This five-day course provides crewmembers detailed information on how to handle a medical emergency in the challenging, remote maritime environment. The course complies with STCW Reg. V1/4 Sect. A-VI/4-2, and MedAire is approved to deliver the course by the Maritime and Coastguard Agency (MCA).

STCW'10 PROFICIENCY IN MEDICAL FIRST AID: 3 DAY + ELEARNING

This three-day course trains crew to be proficient in medical first aid in the challenging, remote maritime environment. The course complies with STCW Reg. V1/4 Sect. A-VI/4-1, and MedAire is approved to deliver the course by the Maritime and Coastguard Agency (MCA).

The course complies with STCW Reg. V1/4 Sect. A-VI/4-2, and MedAire is approved to deliver the course by the Maritime and Coastguard Agency (MCA).

STCW'10 ELEMENTARY FIRST AID: 2 DAY

This two-day course provides crewmembers detailed information on how to provide elementary first aid in the challenging, remote maritime environment. The course complies with STCW Reg. V1/1 Sect. A-VI/1 (para 2.1.3), and MedAire is approved to deliver the course by the Maritime and Coastguard Agency (MCA).

STCW'10 MCA PROFICIENCY IN MEDICAL CARE ON BOARD: 3 DAY REFRESHER

A refresher course for crewmembers. The three-day course allows crewmembers to re-certify under the STCW'10 Medical Care on Board requirement given that a prerequisite has been met within the previous 5 years.

Training course recognised by the MCA

MEDICAL TUNE UP TRAINING: 1 DAY

THIS ONE-DAY, HANDS-ON COURSE PROVIDES CREWMEMBERS WITH A DETAILED REVIEW AND OVERVIEW OF ONBOARD MEDICAL EQUIPMENT AND RESOURCES.

It is estimated that 60% of learned safety knowledge is lost six months after a course. Our one-day Tune Up course onboard your vessel ensures your skills are fresh and you are prepared to take the best care of crew, guests and owners.

This one-day, hands-on course provides crewmembers with a detailed review in order to handle a medical emergency in the challenging, remote maritime environment. This course format allows the opportunity for crewmembers to undertake training on their own equipment, in their own environment.

Training will be centered on the skills of the crewmembers present in the course, and may include topics including but not limited to primary assessment, CPR, use of the AED, airway management and oxygen equipment, control of bleeding and fracture management, stabilisation and immobilisation, use of the intraosseous unit and a kit review.

VIRTUAL TUNE-UP TRAINING: 4 HOURS

OUR VIRTUAL TUNE-UP TRAINING FOCUSSES ON THE FIRST AID ESSENTIALS TO HELP YOU EFFECTIVELY MANAGE AN ONBOARD MEDICAL EMERGENCY

This 4 hour, virtual course provides crewmembers with a detailed overview of onboard medical equipment and resources, in order to handle a medical situation in the remote maritime environment. Topics covered will include: Timeline to Survival, Medical Kit Manual and App, CPR and AED review, Airway management with Oxygen, Controlling Bleeding and Fractures and the Bone Injection Gun.

Training will be provided virtually via Zoom, up to 12 crew members can join and you will need a screen to display the presentation, as well as a large space such as the crew mess or another gathering area.

PAEDIATRIC FIRST AID TRAINING: 1 DAY

TRAINS CREWMEMBERS TO RECOGNISE, STABILISE AND TREAT COMMON CHILDHOOD AILMENTS AND LEARN VALUABLE LIFE-SAVING SKILLS SUCH AS PAEDIATRIC CPR AND PROPER USE OF AN AED.

Children react differently than adults when faced with illness and injury. Learning how to recognise, stabilise and treat children onboard quickly and appropriately will be lifesaving. Our instructors will take your crew through the basics of first response for children and infants onboard your vessel.

MedAire's Paediatric First Aid On Board course trains crewmembers to recognise, stabilise and treat common childhood ailments and learn valuable life-saving skills such as paediatric CPR and proper use of an AED.

In this one-day course, students will learn how to complete a head-to-toe assessment of the patient, focusing on the differences between adults and children; review the items in the Paediatric Kit; practice a scenario with MedAire's telemedicine service, MedLink; and practice hands-on skills. A current first aid certificate is required to attend.

TREATING ILLNESS & INJURY IN ELDERLY PATIENTS TRAINING: ONE DAY

HELPS CREWMEMBERS TO LOOK AFTER ELDERLY GUESTS ONBOARD, ENABLING THEM TO DELIVER AGE-APPROPRIATE CARE FOR THOSE SPECIFIC NEEDS

Suitable for all crewmembers, this course teaches core principles of elderly care, considering the different types of physiological risks (digestive, cardiovascular, musculoskeletal, respiratory, endocrine) that come with old age and providing essential knowledge about how to support, both through preventative and in-the-moment care.

Practical and hands-on, this course offers an essential insight into some of the common risks we see when our clients travel with elderly guests onboard.

Suitable for vessels with aging owners or those accommodating elderly guests onboard, this course is a fantastic add-on to a one day tune-up training course.

MARCH TRAINING: 2 DAYS

MASSIVE HAEMORRIDGE, AIRWAY, RESPIRATION, CIRCULATION AND HYPOTHERMIA - OUR MARCH TRAINING ENABLES CREW TO MORE EFFECTIVELY HANDLE SERIOUS MEDICAL TRAUMA AS A TEAM

This intensive two-day course is recommended for up to 8 crewmembers, with advanced first aid knowledge.

Crewmembers will follow a variety of scenario-based drills, learning how to respond more efficiently to medical situations by using the concept of a PIT crew - everyone having a defined role within the team, using appropriate equipment for the scenario.

Designed for more remote cruising plans, extreme sports and vessels with a heavy diving focus, this advanced medical course equips your crew with the skills to work as a cohesive team.

MENTAL HEALTH VIRTUAL TRAINING: 90 MINS

THESE TWO 90 MINUTE VIRTUAL TRAININGS CREATE A MORE SUPPORTIVE CULTURE SURROUNDING MENTAL HEALTH ONBOARD.

Crew: Mental Health and Wellness Awareness - this session is tailored to crewmembers and focusses on key strategies to help them develop mental resilience, within the context of the superyacht environment.

Managers: Supporting Positive Mental Wellbeing Onboard - this session looks at identifying potential issues to help managers better support the emotional needs of crewmembers.

Training will be provided virtually via Zoom and up to 20 crew members can join (allowing rotational crewmembers to join remotely). You will need a screen to display the presentation, as well as a large space such as the crew mess or another gathering area

MEDICAL & FIRST RESPONDER TRAINING TAILORED TO YOUR CREW, YOUR ITINERARIES, AND YOUR ACTIVITIES

When an accident occurs, you need to act fast. MedAire medical training ensures you and your crew are prepared, capable, and confident to respond.

MedAire's instructors provide hands-on, comprehensive medical instruction. Your crew will learn how to recognise, manage and cope with illness and injury that may occur in the daily operation of the vessel and while at sea.

Lesson plans are based on real-life scenarios and best practices learned from our more than 30 years supporting maritime clients. Call MedAire to discuss a solution to fit the needs of your crew and guests.

YOUR VESSEL/ YOUR EQUIPMENT: Your crew will learn where the medical equipment is located on the vessel, check that it is in working order, and practice how to use it.

YOUR TEAM: MedAire training is an opportunity to up-skill your crew and engage in team building.

CONVENIENT: MedAire is certified by the MCA to train on your vessel. We come to you, when it's convenient for you and your crew.

VALUE: MedAire's flexible training format allows crewmembers to complete the training applicable to their job duties and/or mariner certification requirements. That means different levels of crew can attend the same class, on board, avoiding sending them elsewhere.

CUSTOM: MedAire can also provide bespoke training tailored for your itineraries, including: cold weather considerations.

ENSURE YOUR CREW ARE PREPARED, CAPABLE AND CONFIDENT:

- Patient assessment skills
- Anatomy and physiology
- Invasive procedures
- Marine injuries and poisonings
- Wound management
- Cardiopulmonary Resuscitation (CPR)
- Travel medicine
- Medical and traumatic emergencies
- Using an Automated External Defibrillator (AED)
- Onboard oxygen systems
- Ongoing patient care
- Protection from bloodborne pathogens and infectious disease
- Review the medications and equipment available in the onboard medical kits
